- **TECHNOLOGY CONSULTING**
We understand small business. We have the technical knowledge to get the job done correctly.
- **TECHNOLOGY TRAINING**
One on one or classroom instruction on popular applications, PC security, web marketing, and more.

INFORMATION TECHNOLOGY SOLUTIONS THAT WORK FOR YOUR BUSINESS.

Not very long ago, the decision to apply information technology to a new small business was optional. Business owners knew that information technology (IT) was complex and expensive. Customers were not necessarily technology savvy, and most small businesses could interact with customers in person or on the phone. Today, having both a web presence and an e-mail address is a business necessity. Conducting business online is no longer a novelty—it's the norm.

The good news is that basic small business IT is not necessarily complex or expensive. Oriac Technology Partners is uniquely positioned to provide you with IT solutions that fit your business well, and can grow as your business grows. Better yet, our solutions are available to you at a reasonable cost. Benefit from our expertise and our experience—call or e-mail us today for more information and a free consultation.
